

we wish to oppose and action that would negate any portion of the Indiana do-not-call restrictions. We are very happy with the way it had worked and see no reason the CBA cannot live with it. We have a firm rule that we do not buy, contribute or otherwise participate in any activity as a result of telephone solicitation and will not do business with anyone who persists in this type of activity. We see no legitimate reason for the commission to involve itself beyond denying this petition.
